Exp. 6 Uploading ER Diagram in Azure DevOps Wiki

DEFINITION:

An **ER (Entity-Relationship) Diagram** is a database design diagram that represents entities, their attributes, and relationships between them.

PURPOSE:

• To model the structure of a database

• To represent relationships between data

• To design and organize data efficiently

BASIC COMPONENTS (Notations):

1. Entity

• Represents a real-world object or table

• Drawn as a **rectangle**

Example: Student, Course

2. Attribute

• Represents properties of an entity

• Drawn as an **oval shape**

Example: Name, ID

3. Primary Key

• Unique identifier of an entity

• Underlined attribute

Example: Student_ID

4. Relationship

• Shows how entities are related

• Drawn as a **diamond shape**

5. Connecting Lines

• Connects entities, attributes, and relationships

• Represented by **straight lines**

6. Cardinality

• Defines the number of relationships
• Example:

- One-to-One (1:1)
- One-to-Many (1:M)
- Many-to-Many (M:N)

HOW TO UPLOAD ER DIAGRAM

AIM:

To upload an ER Diagram in the Wiki using Azure DevOps.

TOOLS REQUIRED:

• Azure DevOps

• Web browser

• ER Diagram image (PNG/JPG)

PROCEDURE:

Step 1: Open Azure DevOps

• Go to Azure DevOps

• Sign in with your Microsoft account

Step 2: Select Project

• Choose your existing project from the dashboard

Step 3: Navigate to Wiki

• Click on **Wiki** from the left menu

• If Wiki is not created:

o Click **Create Wiki**

o Select **Project Wiki**

Step 4: Create New Page

• Click on **New Page**

• Enter **ER Diagram**

Step 5: Upload Diagram

• Click on **Insert Image (image icon)**

• Choose **Upload from Computer**

• Select the **ER Diagram file**

• Click **Upload**

Step 6: Save the Page

• Click **Save**

Step 7: Verify Upload

• Ensure the ER Diagram is displayed correctly

RESULT:

Thus, the ER Diagram was successfully uploaded to the Wiki using Azure DevOps.
